Piano Wizard Premier (Allegro Multimedia) \$199.95

Piano Wizard Premier is a revolutionary teaching platform that is changing the way kids learn piano. It combines the fun of a video game with the fundamentals of piano lessons, which means your child can sit at a keyboard today and play anything from Bach to Stevie Wonder. With Piano Wizard, your child can download and play any MIDI song from virtually any artist, whether classical, pop, rock, country or alternative. The method is inherently different from other music-teaching approaches because it introduces actual playing of real music with an amazingly simple interactive video game. The technology allows virtually anyone to play songs within minutes and transforms the tedious and traditional methods of piano practice into an exciting video game. Children choose from four different fantasy worlds to play in. They can change the speed, the instrument sounds, the skill level and more. And in addition to the MIDI songs that come standard with Piano Wizard Premier, thousands more can be downloaded from Internet libraries. Learn more at www.pianowizard.com.

Sony Walkman Bean Player - NW-E300 Series 512MB - S150 / 1GB - S180

Okay, you have to admit it. They're cute! Sony's Walkman Bean digital music players are flash-based devices that are sure to be a feast for the ears as well as the eyes. Bright and colorful, the compact NW-E300 series players sport a sassy design and come in such tasty colors as coconut white, tropical blue, cotton candy pink and licorice black. They're a playful and easy way to enjoy

digital music. Aside from their cool design, the Beans play back both MP3 and ATRAC3/3plus music files in addition to supporting WMA and WAV formats. They provide up to 50 hours of continuous playback on a rechargeable battery and feature a very cool quick-charge function that enables about three hours of playback on a time-saving, three-minute charge. The ergonomic shape slips nicely into your hand, and the display can easily change orientation for both right- and left-handed users. Bottom line: They just make you smile.
